

Bryan Leung

Full Stack Software Engineer

EXPERIENCE

Einstein Studios, San Francisco — Full Stack Engineer

Dec 2018 - PRESENT

- Assembled the MVP web platform that enabled parents and teachers to interact, schedule sessions, and process payments
- Discussed growth and user acquisition strategies while leading weekly status update meetings
- Integrated AWS, Stripe API, and Google Calendar API

PROJECTS

Rawls – github.com/Rd-Feng/Project_RAWLS

- Presented at GoogleX cyber security and blockchain meetup
- Designed a full stack web app that grants consumers control and transparency on the privacy and monetary value of their data
- Conceptualized the POC, using smart contracts, HTML, CSS, JSX, React, Blockchain (Ethereum), Google Firebase, and IoT devices

MyReads – github.com/byn3/reactnd-project-myreads-starter

- Bookshelf website where users can search for books and store them in 3 different categories: will read, reading, and have read
- Utilized React, a custom API, and a service worker

Hood Map – github.com/byn3/hood_map

- Single page website that lists all libraries near Twitter HQ
- Created with React, Google Maps API, and Foursquare API

DateDitcher

- Won 2nd place during the hackathon by designing a chatbot that sent the user a fake urgent message as an excuse to leave an event
- Constructed with Dell BoomiWorkflow and Twilio API

EDUCATION

Holberton School, Software Engineer, Jun 2018 – Present

Udacity, Front End Nanodegree, Jan 2018 – Nov 2018

UC Santa Cruz, B.S. Human Biology

(650) 455-2948
